### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

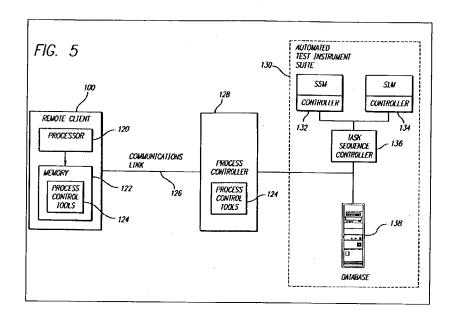

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7 – 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Layne et al. (U.S. Pat. No. 5,968,731 A). Regarding claims 7 and 12 – 14, Layne et al. teach an automated apparatus for analyzing biological samples. Layne et al. anticipate an apparatus for mechanical control comprising a mechanical control system having both object-oriented and real-time features, including modular techniques, such as the use of subsystem base classes, for controlling the operations of multiple subsystems (see col. 8, line 13 – col. 15, line 57; figures 4 – 6, 8 & 10 – 12). The Courts have held that the manner of operating an apparatus does not differentiate an apparatus claim from the prior art, if the prior art apparatus teaches all of the structural limitations of the claim. See *Ex Parte Masham*, 2 USPQ2d 1647 (BPAI 1987). Furthermore, the Courts have held that apparatus claims must be structurally distinguishable from the prior art in terms of structure, not function. See *In re Danley*, 120 USPQ 528, 531 (CCPA 1959); and *Hewlett-Packard Co. V. Bausch and Lomb, Inc.*, 15 USPQ2d 1525, 1528 (Fed. Cir. 1990) (see MPEP § 2114).

Art Unit: 1743

Regarding claims 8, 9, 13, and 14, Layne et al. teach that the computer control apparatus (e.g., 128 & 136) incorporates the use of a sequencing, scheduling or timing function (see col. 8, lines 44 – 64; col. 9, lines 40 – 67). Regarding claim 10, Layne et al. that the computer control apparatus comprises a recipe or computer algorithm containing instructions for enabling the instrument to perform each assay (see col. 8, lines 13 – 59; col. 10, lines 28 – 43). Regarding claim 11, Layne et al. teach that the computer control apparatus comprises a chronicle or table, which stores test history information, such as sample concentrations, pertaining to each assay run (see col. 10, line 33 – col. 11, line 38).

## Response to Arguments

Applicant's arguments with respect to claims 7 - 14 have been considered, but are most in view of the new ground(s) of rejection.

Art Unit: 1743

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Sines, Ph.D. whose telephone number is (703) 305-0401. The examiner can normally be reached on Monday - Friday (11:30 AM - 8 PM EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill A. Warden can be reached on (703) 308-4037. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
